

Feb. 22nd, 2024

Dear partners,

Weintek hereby announces the end-of-life for the following model.

E.O.L Model	Last Order Date	Last Shipment Date	Recommended Replacement Model
MT8053iE	Please contact our sales representative.	Please contact our sales representative.	cMT2058XH <small>*Release date to be announced.</small>

As market demands evolve, the iE Series is now unable to meet the latest requirements; therefore, Weintek has decided to discontinue the production of MT8053iE, and recommends cMT2058XH, a cMT X Standard HMI, as its replacement.

First and foremost, cMT2058XH will share the same cutout dimensions as the E.O.L model, ensuring a seamless transition. In addition, cMT2058XH is equipped with a quad-core CPU, 800×480 high-resolution display, 4 GB Flash, 512 MB RAM, and enhanced software support to fulfill the requirements of the latest industrial applications. In terms of performance, security, and stability, cMT2058XH is more powerful than MT8053iE, and we believe that upgrades to cMT2058XH will prove beneficial.

Here are spec comparisons between these two models:

	E.O.L Model MT8053iE	Recommended Replacement cMT2058XH
Display	4.3" TFT	4.3" WVA
Resolution	480 × 272	800 × 480
