EUROMAP63
KWP-EMP630-PRD

Product Overview

The EUROMAP 63 driver for KEPServerEX enables communication with injection molding machines via the EUROMAP 63 protocol. It provides read/write data access to the leading manufacturers' injection molding machines to connect to IoT, SCADA, HMI, and measurement applications.

This driver may require vendor specific software to be purchased or enabled.

Features

- Real-time data access to EUROMAP 63-enabled injection molding machines
- Read-write capabilities for the following EUROMAP 63 data types: Boolean, Byte, Char, Short, Word, Long, DWord, INT, Float, String
- Automatic tag generation from the device and from offline GETID file
- Support for arrays and strings
- Device diagnostics

Protocols

- EUROMAP 63

Supported Devices

- Cincinnati Milacron
- ENGEL
- FANUC
- KraussMaffei
- Sumitomo Demag
- TOYO
