

InTouch Client

SKU: KWP-WWINT0-PRD

Product Overview

The InTouch Client driver was designed specifically for use with KEPServerEX to expose Wonderware InTouch tag databases to OPC clients. This includes all I/O and memory tags in the InTouch Tag Database, such as configured local and remote tags. KEPServerEX automatically optimizes data acquisition based on client demand. Data integrity is ensured with our extensive error handling.

Features

- Supports Automatic Tag Database Generation
- Has the ability to import tags defined in Wonderware InTouch applications
- Includes three modes of data access to optimize communications with InTouch, and can obtain data via Driver polls InTouch, InTouch notifies driver, or Combination
- Includes addresses with Mode Override
- Supports all major data types

Supported Devices

- Wonderware InTouch HMIs

Application Support

- OPC Data Access (OPC DA) Versions 1.0a, 2.0, 2.05a, and 3.0
- OPC Alarms and Events (OPC AE) Version 1.10
- OPC Unified Architecture (OPC UA) Version 1.01
- OPC .NET Service (OPC .NET) Version 1.00
- SuiteLink and FastDDE for Wonderware
- NIO Interface for iFIX
- DDE Format CF_Text and AdvancedDDE

Additional Tech Info

- Wonderware InTouch 7.1 or higher is required. InTouch 7.11 and higher cannot be installed on Windows 98 systems.
- This driver can import tags defined in an InTouch project. Devices are dependent on the Wonderware InTouch application. The InTouch client driver can only connect to an InTouch Project Tag Database running on the same PC that it is on.
